PROFESSIONAL SUMMARY

Senior Software Quality Assurance Engineer & Developer with over 4 years of experience in software engineering and quality management. Possesses dual technical expertise in **AI-Assisted Software Testing & Automation** and modern web development leveraging the latest JavaScript/TypeScript ecosystem including **Next.js, Node.js, Express.js, React, and REST APIs**. Experienced in Manual & Automation Testing (Web, Mobile, API) using Robot Framework, Katalon Studio, Selenium, and Postman within Agile/Scrum environments. Strong background as a Fullstack/Web Developer provides deep system architecture insight, clean code principles, Generative AI workflow efficiency, and advanced root-cause analysis for both backend and frontend defects.

SKILLS & TOOLS

Modern Web & Software Development: Node.js, Next.js, React.js, Express.js, TypeScript, JavaScript (ES6+), PHP (CodeIgniter), HTML5/CSS3, RESTful APIs, MySQL, PostgreSQL, Oracle DB, Git/GitHub.

AI Adoption & Productivity: AI-Assisted Testing & Coding (Prompt Engineering), Generative AI Scripting (GitHub Copilot, ChatGPT, Claude), Auto-Generated Test Cases & Test Data, AI-Driven Code Review & Bug Analysis.

Software Testing & QA: Manual Testing, Test Automation, Web & Mobile Testing, API Integration Testing, Regression Testing, Performance Testing.

QA Tools & Methodologies: Robot Framework, Katalon Studio, Selenium, TestCafe, Postman, TestRail, Jira, Confluence, Agile/Scrum Framework (Sprint Planning, Daily Standup, Retrospectives).

WORK EXPERIENCE

Senior Software Quality Assurance Engineer

2021 – Present

PT Amarta Mikro Fintek

- Spearhead quality assurance across Web Admin Panels, Mobile Applications (Amarta Plus), and REST APIs using a blend of Manual Testing, Automation, and **AI-assisted tooling**.
- Leverage **Generative AI & Prompt Engineering** to accelerate the creation of Test Scenarios, Edge Cases, Test Cases, as well as **Robot Framework** automation scripts and **Postman** API assertions.
- Utilize modern software development experience (Node.js/JavaScript) to analyze backend API structures, streamline root-cause analysis, and expedite complex bug resolution.
- Actively collaborate across all Agile/Scrum ceremonies (Backlog Grooming, Sprint Planning, Daily Standups, Sprint Reviews, and Retrospectives).

Software Quality Assurance Engineer

2020 – 2021

IDN Media

- Ensured optimal quality and performance for high-traffic media web platforms (IDNTimes.com, Popmama.com, Popbela.com, Duniaku.com, GGWP.id) and mobile applications (IDN Apps, Yummy Apps).
- Executed Functional Testing, API Testing, and routine Regression Testing to guarantee release stability.
- Built and deployed automated testing frameworks utilizing **Katalon Studio** and **Robot Framework**.

Freelance Software Quality Assurance Engineer

2020 (3 Months)

PT Riliv Psikologi Indonesia

- Conducted end-to-end manual and automated testing for Riliv's Web CMS platform and Mobile Application.
- Initiated and designed the foundational **Automation Testing** architecture for the Riliv web ecosystem.

Web & Software Developer

2019 – 2020

PT Sinergi Informatika Semen Indonesia (SISI) / Project-Based

- Architected and developed modern web applications and interactive Customer Relationship Management (CRM) dashboards using **Node.js, Next.js, and CodeIgniter** with **Oracle / MySQL** databases.
- Engineered high-performance RESTful APIs to integrate real-time data across market insights, sales representatives, coordinators, and field inspectors.
- Performed internal testing (Unit/Integration Testing), authored API technical documentation, and maintained application stability.

EDUCATION

Universitas Internasional Semen Indonesia (UISI) Bachelor of Engineering (S.T.), Informatics Engineering • Head of Public Relations Division, Informatics Student Association (HIMA Informatika UISI). • Focus of study: Software Engineering, Modern Web Development, and Information System Architecture.	Graduated 2019
SMK Semen Gresik Software Engineering Vocational Major (RPL) • Student Executive Board (OSIS) Officer Jujitsu Martial Artist.	Graduated 2015

KEY PROJECTS & PORTFOLIO

Modern Web & API Development Projects <i>Next.js, Node.js, Express, React, REST APIs</i> • Engineered high-performance web applications using the Next.js & Node.js stack, implementing Server-Side Rendering (SSR), modular architecture, and secure API integrations.
Customer Relationship Management (CRM) System (2019) <i>PT Sinergi Informatika Semen Indonesia</i> • Developed a desktop-friendly web portal for market data analytics alongside a mobile sales tracking application.
Augmented Reality Cafe Ordering System (2019) <i>Undergraduate Thesis Project - UISI</i> • Developed an AR-powered mobile ordering application (Unity 3D) coupled with an administrative web dashboard for real-time order processing.

INTERNSHIP EXPERIENCE

KPPBC (Customs & Excise) Gresik – Systems Analyst & Administrator	Internship
PT Semen Indonesia (Persero) Tbk – IT Support Intern	Practical Work (3 Months)
